

Please DON'T mess up my radio station!!! This is the only station in our area with good Christian music. There are many people who are dependent on K-Love to bring them positive music. The only other choices are either country or hard rock. By changing the way the station has to operate you are taking away an alternative choice for the listening audience. I live in a poorer section of town and we are dependent on listening to uplifting music to make things a little easier. Twice a year our station has a pledge drive to raise funds to stay on the air. If people weren't interested in this station being able to broadcast, it would have closed down from lack of funds years ago. We need our station to stay on the air and if you mess up how they operate it won't happen.
